I often waste time walking to the mess only to find out the queue is too long to wait.

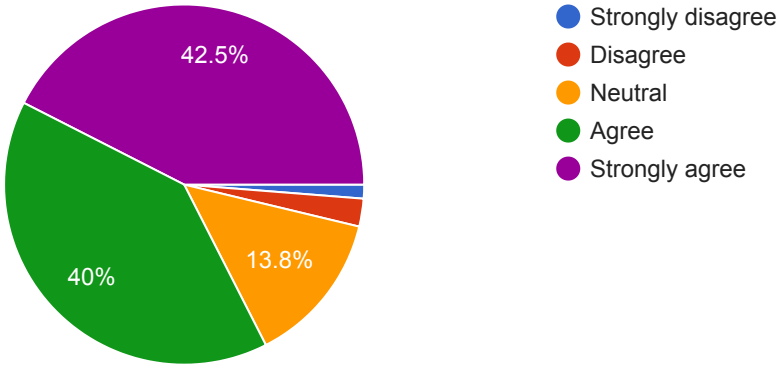
Knowing exactly how crowded the mess—and especially during the exam times—is *before* I leave my room would save me a ton of wasted time during peak hours.

Copy

160 responses



If I could see on our phones that the mess is currently at Peak Crowd, we would use that to delay our meal by 15-20 minutes to avoid the rush.

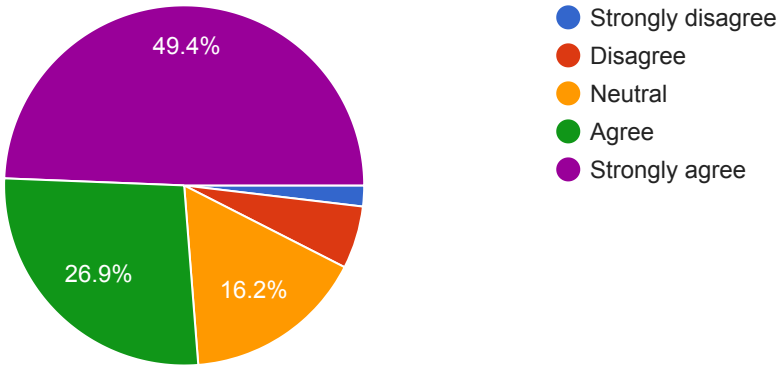
The current manual paper-coupon or token system for booking mess "extras" is inefficient and frustrating.

Copy

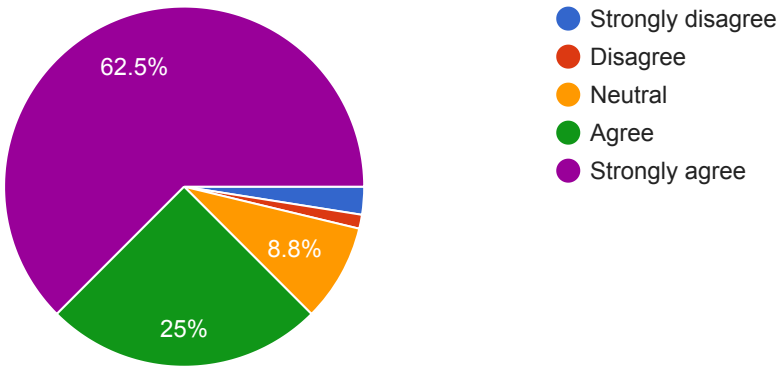
160 responses



It's incredibly frustrating when I finally reach the mess only to find out the best extras are already sold out.

Copy

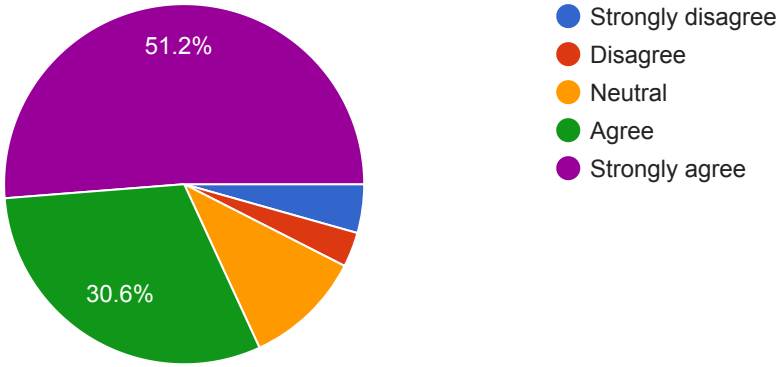
160 responses



I would prefer using a digital QR/OTP-based system on my phone to pre-book mess extras rather than dealing with the counter.

Copy

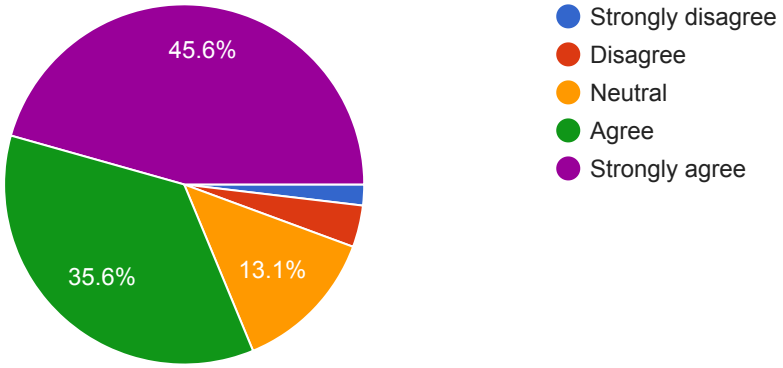
160 responses



I find it frustrating that there is no clear way to know exactly how long my food will take to be prepared after I order at the counter, especially during the exams or festive hours.

Copy

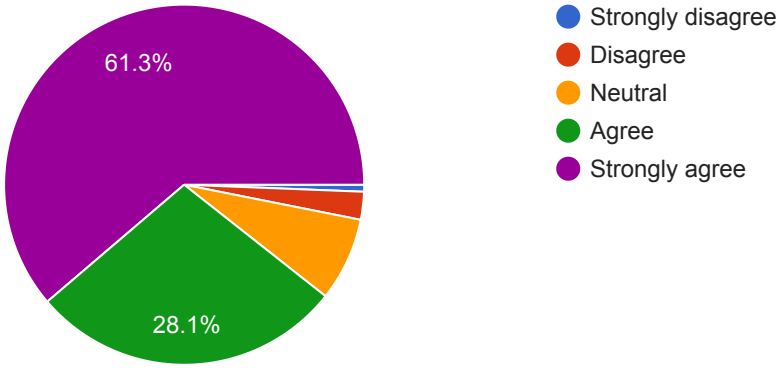
160 responses



I would actively use a feature that lets me pre-order canteen food from my room on any canteen on the campus and notifies me exactly when it's ready for self-pickup

Copy

160 responses



There are definitely days where I would happily pay a small delivery fee to have someone bring my canteen order straight to my hostel room from my hall canteen.
